

QUICK FIND[®]

Alarm Origination & Location Feature

WHAT IT DOES

ALARM ORIGATION QUICK FIND[®] FEATURE: During or following an alarm, it may be difficult to determine which alarm initiated an alarm event. This patented Quick Find[®] feature will immediately allow you to locate the originating alarm once the alarms have stopped sounding.

HOW TO USE IT

1. Press and hold the Test/Silence button on any alarm until the test sequence on this alarm begins. Release the test button.
2. Once this test sequence ends, the originating alarm continues to sound for approximately 60 seconds, which provides ample time to locate the originating alarm.
3. Remember to reset the originating alarm in order to clear the Quick Find[®] alarm origination and to return your system to normal operation.
4. To reset alarm origination, press and hold the test button on any alarm for approximately 10-15 seconds. Reset after each alarm event. The reset feature will reset all interconnected alarms and return the system to normal operation.
