

## Quick Find<sup>®</sup> Alarm Origination/Location Feature

This Quick Find<sup>®</sup> feature will allow you to immediately locate the originating alarm, once the alarms have stopped sounding.

1. Press and hold the Test/Silence button on any alarm until the test sequence on this alarm begins. Release the test button.
2. Once this test sequence ends, the **originating alarm** continues to sound for approximately 60 seconds, which provides ample time to locate the originating alarm.
3. Remember to **reset** the originating alarm in order to clear the Quick Find<sup>®</sup> alarm origination and to return your system to normal operation.

## Reset Instructions

1. Press the Test/Silence button for 10 seconds, or until the blue LED turns on, and then release. This will clear the alarm latching LED's and clear the alarm origination. Reset after each alarm event.

Refer to the Interconnect Compatibility section of the user's manual for additional information. In a non-interconnected installation, it is necessary to test each alarm to determine the originating alarm.
